Potted Blooming, Foliage, and Fresh Cuts.

Weekly Safety Bulletin

Slips, Trips, and Falls

- There are multiple hazards out there in the work place that can cause Slips, Trips, and Falls.
- Wet floors are by far the most common hazard.
- Your biggest weapon against this is “Situational Awareness.”
- For our Merchandisers, any water on the floor is not only a hazard for us, but also for our customers.

Blocking Walkways and Exits

- It is never okay to block an Emergency Exit.
- Always make sure that you leave enough room for personnel to access the exit and still be able to see the “EXIT” sign.
- At customer locations, there are designated walkways - so please make sure they are kept clear to ensure means of egress for all personnel.
